

# Ammonium Nitrate fertiliser

## No photo ID means no sale

Controls for the supply of explosives precursors  
applicable from 1 October 2023

It is mandatory to provide a photo ID when ordering ammonium nitrate (AN) fertiliser - without it, the sale will be declined and you may be reported to the Police.

Farmers purchasing AN fertilisers containing 16% nitrogen and above must prove their identity with photo ID – e.g. driving licence, passport, gun licence. Vendors must keep a record for Police inspection.

Any compound fertilisers containing 16% nitrogen and above derived from AN - which includes N from calcium ammonium nitrate (CAN) – also require photo ID.

Purchasers of certain plant protection products, biocides and acids are also affected and require photo ID.
