

The Combinable Crops Passport is designed to improve the traceability and assurance status of combinable crops. It is important to note that incomplete or incorrectly completed passports may lead to rejections and delays at delivery destinations. If any party – grower, storekeeper or haulier – has any queries about the completeness or accuracy of a passport, it is advisable they verify its acceptance with their contractor, eg merchant or delivery destination, before leaving the collection site.

Section 1 Information on variety(ies), year of harvest and store/bin number should be completed on all parcels for food sector end users, e.g. flour millers, maltsters, breakfast cereal manufacturers. Buyer's advice should be sought if in any doubt. Loading date is a requirement on all parcels. Where applicable, the Trailer ID No field must include both the trailer ID and the haulier's assurance participant.

Section 3 Inspection of vehicle.

Section 5 Mycotoxins: whilst a risk assessment for wheat deliveries to food processors is a year round requirement, testing outside the immediate post harvest period may vary across different processing sectors. To avoid doubt as to what is required please contact your purchaser to check actual requirements. Additionally, the requirement for a risk assessment result has been clarified to show a number is required.

Section 8 Renewable Energy Directive: a signature declaration to meet the requirements of the RED. Required in all instances where crop may enter the biofuel supply chain and in conjunction with auditing to the required sustainability criteria under crop assurance.
