Scheme Rules

1	Introduction
1.1	FIAS covers the assurance of all fertilisers intended for agriculture, horticulture, forestry, amenity and any other such commercial use. It does not apply to fertilisers packaged for home garden use. The issues and risks vary according to the type of fertiliser and it is for this reason that the entire scheme has adopted a business process risk assessment approach to achieving the necessary level of assurance.
1.2	FIAS is a voluntary scheme developed by AIC in response to the need to prevent the misuse of fertilisers.
1.3	FIAS provides a safe and controlled environment for the sourcing, import, manufacture, packing, storage, merchandising and transport of fertilisers.
1.4	FIAS provides a credible independent assessment to demonstrate that the Participant complies with requirements for: <ul style="list-style-type: none"> • relevant legislation • security • traceability • product safety
1.5	FIAS is managed by AIC, who developed and implemented the scheme. The fertiliser industry, other stakeholders and end users are consulted during revisions of the scheme.
1.6	FIAS is a Certification Scheme delivered by a Certification Body accredited to International Standard ISO/IEC 17065. A list of Participants is publicly available via the AIC website: www.agindustries.org.uk/trade-assurance-checker
1.7	To become FIAS certified, a fertiliser business must be assessed by the Certification Body and demonstrate full compliance with the current version of the standard as applicable to their operations. The Certification Body administers the scheme and, in most cases, performs the on-site audit. However, a Participant may select, if they wish, an alternative organisation to carry out the on-site audit activity from a list of approved Inspection Bodies appointed by the Certification Body for this purpose. The list of approved Inspection Bodies is available from the Certification Body.
1.8	By applying for certification to FIAS, the Applicant agrees that, if accepted, they will comply with requirements of the FIAS Standards and the FIAS Scheme Rules, putting in place the resources required to do so.
1.9	All fees and costs of certification as charged by the Certification Body are published on the AIC FIAS website www.agindustries.org.uk/fias-membership , with the exception of costs related to extra/immediate audits.
2	FIAS scope
2.1	The FIAS standard encompasses all the operations and activities of a Participant that may have a bearing on the legal compliance, product safety, security and traceability of the fertilisers supplied: from raw material procurement through to the point at which any fertilisers produced are transferred to an end user. The scope of operation must be clearly defined and agreed with the Certification Body.

Scheme Rules

	<p>Audits will therefore include:</p> <ul style="list-style-type: none"> • General requirements • Manufacturing • Storage • Product sales and distribution/ Merchanting • Transport
3	Claims associated with FIAS certification
3.1	Participants who achieve successful certification against this FIAS Standard are reminded that FIAS is a certification programme. Claims of FIAS certification may only be made by Participants in relation to their declared scope of operation.
3.2	The FIAS acronym and logo are registered certification marks and must only be used in compliance with the rules laid down by AIC which can be found on the AIC website www.agindustries.org.uk/ta-brand-guidelines
4	Confidentiality
4.1	All information concerning Applicants and Certified Participants will be treated in confidence. Specific information, such as details of individual audit reports, will not be divulged to any third party without the written agreement of the Applicant or Participant. The exceptions are:
4.1.2	The Certification Body and/or AIC will confirm the Scheme ID number, name and address and if the company is a certified Participant, along with the expiry date and scope of certification. These details are also available on the AIC website at www.agindustries.org.uk/trade-assurance-checker
4.1.3	The provision of information to AIC in relation to audit findings and non-conformances as required to maintain the standards and credibility of the Scheme.
4.1.4	In the event of a Participant being involved in a fertiliser related security or safety incident, details may be discussed in confidence between representatives of AIC and the Competent Authority.
5	Becoming certified to FIAS
5.1	FIAS is open to any company involved in the fertiliser supply chain subject to complying with these scheme rules. In order to become a certified Participant of FIAS, applicants shall:
5.1.1	Complete an application form for certification and return it to the Scheme Certification Body. At this point the Applicant can nominate a preferred inspection body providing that inspection body has appropriately qualified auditors and is approved by the Certification Body.
5.1.2	Cooperate with the Certification body on confirming scope and establishing the audit duration.
5.1.3	Confirm they agree to comply with the Scheme Rules, current FIAS Standard and Certification Body Terms and Conditions by signing the Certification Agreement contained in the quotation and returning it to the Certification Body. The quotation will indicate the duration of the initial and subsequent routine audits.

	The duration of the audit is dictated by the time needed to make the required assessments of the premises, systems and procedures of the Participant.
5.1.4	Pay all relevant fees as published on the FIAS pages of the AIC website.
5.1.5	Agree to an initial audit and rectify any non-conformances within the timeline specified in the scheme rules.
5.1.6	On receipt of application the business name is listed on the AIC Trade Assurance website with a description of “Applied” status. This status can exist only for 6 months after which time the business must be fully approved or will be identified as “Resigned/Withdrawn”. Re-application within 12 months will be permitted only at the discretion of the Certification Body.
5.2	When the Applicant has been audited, has rectified any non-conformances that have been identified and these have been verified by the Certification Body, then the Certification Body will undertake a certification decision and issue a Certificate. The details of the successful Applicant will be added to the list of Participants on the AIC website.
5.3	By applying to join FIAS, the Applicant agrees that, if accepted, they will maintain compliance with the requirements of the FIAS Standard and any relevant associated documents.
5.4	The Applicant or Participant will have no claim against any officers, members or employees of AIC in the event of Expulsion, Suspension or a lesser sanction and/or the publication thereof as appropriate, nor have any claim against any of the above for any damages and/or compensation or costs for any financial loss occasioned thereby.
6	Maintaining FIAS certified status
6.1	FIAS Certificates will be valid from the date on which the Applicant demonstrated conformance with the Standard and expire on the anniversary of the date of the audit.
6.2	Certificates are issued subject to: <ul style="list-style-type: none"> • payment of all relevant fees to the Certification Body • subsequent satisfactory audits
6.3	Participants will be contacted by a representative of the Certification Body prior to the anniversary of their initial audit to arrange a routine surveillance audit. The audit date must be within 6 weeks of the anniversary unless otherwise agreed with the Certification Body.
6.4	Participants shall comply with the Scheme Requirements at all times as defined in the FIAS Standard.
6.5	Participants shall advise the Certification Body of any changes to the business, typically but not limited to: <ul style="list-style-type: none"> • company ownership • scope of operations • key management
6.6	Participants and Applicants shall immediately advise the Certification Body in the event of: <ul style="list-style-type: none"> • being subject to legal action that relates to their FIAS accredited activities

Scheme Rules

	<ul style="list-style-type: none"> • having Earned Recognition revoked by the Competent Authority (transport only) • significant incidents on site that may restrict the ability of the Certification Body to carry out an audit (including extra/immediate audits) • damage the reputation of the FIAS scheme
6.7	Where a Participant becomes aware of any suspicious activity that has the potential to affect fertiliser safety or security, AIC should be informed – for contact details see www.agindustries.org.uk/resource/tell-aic.html

7	Assessment of participant compliance with the scheme
7.1	The Certification Body or the nominated inspection body will assess a Participant's compliance with the Standard. The Certification Body shall be given access to all relevant information needed to confirm compliance with the Standard and the right to inspect third parties subcontracted to perform work covered by the Standard, at the Participant's cost. FIAS audits are not of a fixed duration but are determined on a case-by-case basis.
7.2	The Certification Body will ensure that the same assessor will not assess the same company beyond a consecutive 3 year period. An assessor should have a break of at least 1 year, at the discretion of the Certification Body.
7.3	Types of audit within the FIAS scheme:
7.3.1	Initial audit – a formal, in-depth, on-site assessment for new applicants to confirm that Applicants comply with the requirements of FIAS.
7.3.2	Routine Surveillance audit – a formal annual assessment for certified participants of the FIAS scheme.
7.3.3	Assessment of contractors - at the discretion of the Certification Body, further assessments of contractors approved by the FIAS Participant or Applicant may be required.
7.3.4	Extra/immediate assessment - the Certification Body will carry out extra/immediate audits at their discretion - these audits may incur a cost. Circumstances where these may be required include, but are not limited to: <ul style="list-style-type: none"> • in response to reports or intelligence suggesting a significant fertiliser safety or security issue or breach of FIAS rules and requirements • signing off action points following an audit, particularly if the action points relate to major or critical non-conformances

7.4	Reporting
7.4.1	The Certification Body will produce a report for its own audit purposes and identify any non-conformances to the Participant at the end of the audit. Non-conformances will be classified as shown in section 7.5 and acted upon as per section 8.
7.4.2	Once a Participant has rectified the areas of non-compliance to the satisfaction of the Certification Body and within time limits specified in section 8, the Certification Body issues a FIAS certificate of compliance.

Scheme Rules

7.5 Classification of non-conformances	
Classification	Cause
Critical	A regulatory violation, serious safety or security failure, total loss of traceability such that recall of unsafe goods would be impossible, and/or complete unwillingness to cooperate in the audit.
Major	A complete failure to implement a requirement of FIAS or a failure that may result in a serious safety, security or traceability failure. A recurrence of a minor non-conformance raised at the preceding assessment.
Minor	A partial failure to implement a requirement of FIAS or poor evidence to demonstrate implementation.

8 Response to non-conformances		
Classification	Initial audit	Routine Surveillance audit
Critical	Certification refused. Full re-application and audit required.	Certification suspended with immediate effect. Satisfactory re-assessment required before Participant is reinstated.
Major	Certificate not granted until non-conformances resolved. Plan of corrective actions to be submitted within 15 calendar days of audit and timescales for completion and submission of evidence to be agreed with the Certification Body. Verification of effectiveness of corrective action to be undertaken by Certification Body before certification is granted. Failure to resolve non-conformances within the agreed timescales will lead to a repeat initial assessment or archiving of application.	Certification continues subject to plan of corrective action being submitted within 15 calendar days of audit, and timescales for completion and submission of evidence to be agreed with the Certification Body, typically no more than 60 days from assessment. Verification of effectiveness of corrective action to be undertaken by Certification Body before certification is maintained/renewed. Failure to implement corrective actions and provide evidence to the Certification Body within agreed timescales, will lead to suspension.
Minor	Certification not granted until non-conformances rectified. Plan/evidence of corrective actions to be submitted within 30 calendar days of audit, and timescales for completion of evidence to be agreed with the Certification Body. Verification of effectiveness of corrective action to be undertaken by Certification Body before certification is granted.	Certification continues subject to plan of corrective action being submitted within 30 calendar days of audit, and timescales for completion and submission of evidence to be agreed with the Certification Body, typically no more than 60 days from assessment. Verification of effectiveness of corrective action to be undertaken by Certification Body before certification is maintained/renewed. Failure to implement corrective actions and provide evidence of the Certification Body within agreed timescales, will lead to suspension.

Scheme Rules

9	Observations
9.1	<p>Observations may be raised during FIAS audits. These are:</p> <ul style="list-style-type: none"> • points noted by an assessor that are not technical breaches of the Standard, but could assist the Certification Body, Scheme Owner or Participant • points which constitute a non-conformance but the assessor is unable to confirm this during the audit <p>Observations do not require a formal response to the Certification Body, unless upgraded to a non-conformance during the report review.</p>
10	Report review
10.1	<p>Upon completion of an audit report, it is submitted to the Certification Body for review. As part of this review process, the Certification Body may, based on the evidence collected for the report:</p> <ul style="list-style-type: none"> • seek additional information • remove non-conformance(s) • add non-conformance(s) • change the classification of non-conformances • change observation(s) to non-conformance(s) or vice versa
11	Multi-sited Participants
11.1	<p>Where a business entity operates on multiple sites with the same scope, common system and effective central controls, then, at the Certification Body's discretion, sampling of sites <u>may</u> be possible.</p>
11.2	<p>Applicants and Participants must inform the Certification Body of all sites where FIAS related activities are carried out. All sites must undergo initial audits before a certificate can be issued, however, the routine surveillance audit programme may include sampling of sites in subsequent years provided all sites are covered in an agreed period.</p> <p>For sites covered in this way, one certificate is issued to cover all sites. In the event of the certificate being withdrawn or suspended, all sites will cease to be certified.</p>
12	Certificate suspension and withdrawal
12.1	<p>The Certification Body, following discussion with AIC, may suspend or withdraw a Participant's Certificate when the Participant has:</p> <ul style="list-style-type: none"> • critical non-conformances that have or are likely to have an adverse effect on product safety or security. • non-conformances against the FIAS Standard that are not resolved within the required time limits. • refused access for an audit or extra/immediate assessment. • refused or failed to supply information requested by the Certification Body. • failed to pay relevant fees. • failed to comply with FIAS Scheme Rules or Certification Body Terms and Conditions. • brought the FIAS Scheme into disrepute

12.2	Suspended Participants must correct non-conformances and have a follow-up assessment by the Certification Body to confirm that all the non-compliances have been fully resolved within 30 calendar days of suspension, in order to have their certification re-instated.
12.3	Participants that do not meet the requirements of the Certification Body to have their suspension lifted within 30 calendar days of suspension will have their certificate(s) withdrawn.
12.4	Participants that have their certification withdrawn will be required to undergo the complete audit process and will be considered as Applicants, subject to satisfactory evidence that any issue(s) which led to certificate withdrawal have been rectified.
12.5	The Certification Body will pass all necessary information to AIC to allow the AIC website to be updated with details of a Participant's changing certification status. The names of suspended and withdrawn Participants will be published in the form of AIC Assurance Alerts.
12.6	Suspended Participants may not claim to be FIAS approved nor undertake contracts that specify FIAS registration without advising the client, until suspension has been lifted.
12.7	Participants that no longer require FIAS certification must inform the Certification Body in writing.

13	Complaints
13.1	Complaints about either a FIAS Participant or the Certification Body should be directed to the Certification Body where they will be acknowledged, reviewed and action taken to resolve the cause of any problems.
13.2	The Certification Body is accredited by the UK Accreditation Service (UKAS) and works to strict codes of conduct. If Participants are not satisfied with the way in which the Certification Body handles the complaint, then they should refer the matter to AIC.

14	Appeals
14.1	A Participant has the right of appeal against decisions made by the Certification Body.
14.2	Appeals shall be made in writing to the Certification Body within 14 days of being advised of the decision that is the subject of the appeal.
14.3	The Certification Body will acknowledge the appeal and nominate a manager independent of the decision to carry out an initial investigation to check the merits of the appeal.
14.4	If the nominated manager concurs with the appeal then the Certification Body will correct the erroneous decision.
14.5	If the nominated manager does not concur with the appeal then an independent panel will be convened within 30 days to handle the appeal.
14.6	The Certification Body, including the Scheme Manager, AIC and the Participant are entitled to attend the Appeals Panel and present information to the Panel.

Scheme Rules

14.7	The independent Appeals Panel makes a ruling based on the information supplied during the hearing.
14.8	The ruling of the Appeals Panel is binding and final on the Certification Body and the Participant.

FIAS Standard: General requirements

Clause	FIAS Requirements
G1	Introduction – Scope of the Fertiliser Industry Assurance Scheme (FIAS)
G1.1	<p>FIAS covers the assurance of all fertilisers intended for agriculture, horticulture, forestry, amenity and any other such commercial use. It does not apply to fertilisers packaged for home garden use. The issues and risks vary according to the type of fertiliser and therefore the scheme uses a business process risk assessment approach to achieve the necessary level of assurance.</p> <p>FIAS has been developed in a joint exercise between the UK Government and devolved nations and the UK Fertiliser industry in order to:</p> <ul style="list-style-type: none"> • give regulators confidence in the product stewardship exercised by the fertiliser industry • ensure the supply of fertiliser is managed such that products can be used only for legitimate purposes • ensure that the UK fertiliser supply chain is managed at all stages with regard to security, public safety and the environment. <p>The scheme covers the entire supply chain of fertiliser from sourcing through to delivery of finished products to final user and all related activities. FIAS assures compliance of each stage to the following principles</p> <p>Legislation Specific legal compliance – businesses must meet all regulations applicable to their activities.</p> <p>Security Prevention of unauthorised access to and/or removal of the product and ensuring that fertiliser is only supplied to legitimate businesses.</p> <p>Traceability Identification of batches of raw materials to origin. Identification of batches of finished product to user.</p> <p>Safety Product complies with the legislative safety requirements</p> <p>Good Practice Effective management controls to ensure that the requirements of this standard, environmental measures and relevant fertiliser industry Codes of Practice are implemented</p> <p>All companies certified under FIAS will be subject to an independent external audit of their compliance with the standard under a scheme accredited to the international product certification standard ISO 17065.</p>
G1.2	<p>Basis of the scheme</p> <p>The standard is divided into sections:</p> <ul style="list-style-type: none"> • General • Manufacture and packing • Storage • Product sales and delivery /Merchanting • Transport <p>The FIAS standard must be read in conjunction with the FIAS Scheme Rules.</p>

FIAS Standard: General requirements

G1.3	<p>Participant responsibility</p> <p>FIAS participants must ensure that they adhere to the Scheme Rules, General section and the relevant section(s) for the scope of their declared business activities.</p> <p>The owner of the goods at each and every stage of the supply chain, is the responsible party for ensuring compliance with the FIAS standard.</p>
-------------	--

Clause	Requirement	Guidance
G2	Management commitment	
G2.1	The Company senior management must be committed to the implementation and maintenance of the FIAS Standard/Certification.	
G2.2	<p>The Company shall have a signed and dated policy statement that commits the Company to comply with FIAS.</p> <p>The policy must be communicated to all Company employees involved in fertiliser related activities and be reviewed as part of the management review or as a result of Company changes to make sure it remains current.</p> <p>[R] [T]</p>	<p>The policy statement can be a brief document that is prepared and endorsed by a senior person in the Company, for example, Managing Director.</p> <p>It is acceptable for the Company to use and adapt existing systems, documents, manuals and forms etc. to comply with FIAS.</p>

G3	Management review	
G3.1	<p>Senior management shall carry out an annual review of systems and procedures including:</p> <ul style="list-style-type: none"> • policy statement (G2.2) • risk assessments • external and internal audits (G17 and G18) • incidents and corrective action • training and processes • internal procedures <p>Record of the annual management review must be documented.</p> <p>[R] [T]</p>	“Annual” means within a 12 month period.

G4	Designated person	
G4.1	The Company shall appoint a designated person who must have authority and responsibility for the implementation and maintenance of the requirements of the FIAS standard.	This member of staff may have other duties but must have clearly defined responsibility for ensuring the Company has a system to comply with FIAS.

FIAS Standard: General requirements

G5		Organisation
G5.1	All employees that could affect fertiliser product security, safety, legality, traceability and environmental impact shall be made aware of their responsibilities, the levels/limits to their authority and the organisational structure of the Company. [R]	Job descriptions and a diagram of the Company structure may be helpful. Consider full time and temporary staff.
G6		Personnel and training
G6.1	The Company shall ensure that all personnel, full-time, part-time and temporary employees and agency staff, are trained and competent to carry out their roles and responsibilities related to FIAS. Records of training and competence shall be kept. [R] Training records should show: <ul style="list-style-type: none"> • date • signature and printed name of trainee • trainer information and/or content details 	Training records could show: <ul style="list-style-type: none"> • topics covered • certificates (where held) from internal/external training organisations • self-assessment reports where appropriate • competency records
G6.2	As a minimum, a designated person must complete the relevant AIC i-learning module or equivalent training package (e.g. Driver CPC, internal training).	AIC i-learning modules for Driver, Transport Manager, Merchant and Store are available from www.aictradeassurance.org.uk/aic-i-learning/ Contact uk.fias@kiwa.com , 01423 878875/878873 for log in details and FIAS Driver CPC training information.
G6.3	The Company shall undertake security screening of staff in relation to FIAS activities and products. [R]	Staff screening guidance for businesses on 'Reducing the Insider Risk', 'Pre-Employment Screening' and additional Personnel Security is available from www.cpni.gov.uk/reducing-insider-risk
G7		Procedures
G7.1	The Company shall have working procedures and detailed instructions to control activities to meet the FIAS standard.	
G8		Communication with Certification Body
G8.1	The Company must promptly advise the Certification Body of any significant changes or occurrences within the business that	

FIAS Standard: General requirements

	<p>materially affect compliance with the standard such as:</p> <ul style="list-style-type: none"> • business ownership • scope of operations • change of designated person • addition or closure of sites • being subject to a relevant formal investigation by an external body regarding fertiliser safety and/or security 	
--	---	--

G9		Legislation
G9.1	<p>The Company shall have an effective means of ensuring that:</p> <ul style="list-style-type: none"> • they are aware of all relevant legislation and appropriate systems are in place to ensure full compliance. • they have a means of identifying any changes in legislation 	<p>Sources could include trade associations, government departments, professional bodies and trade journals.</p>
G9.2	<p>The Company shall ensure that authorities are notified and approvals obtained for products held at their sites, where relevant. [R]</p>	<p>COMAH/NAMOS Regulations See Appendices 1 and 7.</p>

G10		Business process risk assessment
G10.1	<p>The Company shall undertake and document a thorough business process risk assessment of its operations in the manufacturing, merchanting, storage and transport of fertilisers in order to identify the hazards and risks related to legal compliance, security, product safety and traceability within those operations. [R] [T]</p> <p>The assessment shall:</p> <ul style="list-style-type: none"> • be carried out by a person or team who have a breadth of knowledge and expertise of all aspects of the operation and are competent in the understanding and practical application of risk assessment principles • define the scope of the fertiliser operations to be considered and lists or charts the process steps. Include all business processes that have an impact on the assessment criteria, such as sales orders, recruitment etc 	<p>In the case of a small business with limited management resources, the FIAS designated person would be expected to have the appropriate experience and knowledge to undertake the business process assessment. External expertise may be required. Ideally the assessment leader should have attended a recognised training course.</p> <p>Note: when considering safety, make sure this relates to product safety and not occupational health and safety.</p> <p>Guidance on completing a FIAS business process risk assessment, example forms and further information are available on the AIC website, www.agindustries.org.uk/fias-resource-library</p>

FIAS Standard: General requirements

	<ul style="list-style-type: none"> • identify hazards in the areas of legal compliance, product safety, security and traceability at every step of the business process • evaluate the risk associated with the hazard(s) • identify and implement controls required to prevent or reduce any identified risks to an acceptable level • establish corrective action procedures to be implemented when identified risks are deemed to be out of control 	FIAS i-learning modules include information on business process assessment and risk levels.
G11	Review of business process risk assessment	
G11.1	<p>The business process risk assessment shall be reviewed by the assessment team/designated person annually and in response to any changes in products, processes, legislation or any other factors that may affect the safety and security of the finished product.</p> <p>The business process assessment review shall be recorded and findings implemented. [R]</p>	The outcomes of the business process risk assessment review should be included in the management review required in G3.1.
G12	Purchasing, selection and assessment of suppliers, contractors and merchants	
G12.1	The Company shall ensure when purchasing goods and services that all relevant FIAS and statutory requirements are satisfied.	Services may include contract manufacturing, storage, transport, product handling, merchanting.
G13	Purchasing of raw materials, packaging and finished products	
G13.1	<p>The Company shall ensure that:</p> <ul style="list-style-type: none"> • all purchased raw materials, and finished products are obtained from business approved suppliers [R] • raw materials, packaging and finished products are purchased against specifications which comply with applicable Statutory requirements and enable it to meet its FIAS obligations [R] • records are kept of all purchased goods [R] 	<p>Material or product specifications may include:</p> <ul style="list-style-type: none"> • description of material or product • technical parameters • safety data • packaging • quantity • storage information
G14	Contracted services – manufacturing, blending and packing	
G14.1	Businesses contracted to manufacture, blend, pack or otherwise change the	

FIAS Standard: General requirements

	nature or format of a product must be FIAS certified.	
--	---	--

G15 Contracted services – storage, transport and merchating		
G15.1	The Company shall ensure that businesses contracted to provide storage, transport, or merchating of fertiliser product supplied by the Company are FIAS certified to the relevant standard. [R]	

G16 Derogation for use of non FIAS certified contractors and merchants		
--	--	--

In this section “Contractor” refers to businesses providing services for storage and transport.

G16.1	A derogation from G15 is available where the Company wishes to use non-FIAS certified contractors for storage and transport or merchant customers for onward sales of fertilisers and Explosive Precursors where used as a fertiliser product (as defined within FIAS scheme rules 1.1).	
G16.2	<p>To qualify for this derogation, before first use of the contractor or sales to the merchant customer, the Company must undertake an initial audit of the contractor’s or merchant’s systems, processes and past operating performance (where available) covering all aspects of the relevant FIAS standard.</p> <p>For storage operations this audit must include an inspection of the storage facilities.</p> <p>The findings of this audit shall be submitted to the Certification Body in a written report for review to determine whether or not the contractor or merchant can be authorised for use in accordance with Clause G15.1.</p> <p>Where granted, authorisation will be confirmed to the Company in writing. [R]</p>	<p>The audit should be carried out by a competent person, either within the Company or an external auditor. Audit checklists are available on the AIC website. [T]</p>
G16.3	<p>To maintain on-going authorisation to use the contractor or merchant services, the Company shall undertake an annual audit of the contractor’s /merchant’s performance and inspection of storage facilities as part of its FIAS internal audit programme.</p> <p>This audit shall cover all relevant aspects of the FIAS Standard. Audit findings including</p>	

FIAS Standard: General requirements

	<p>non-conformances and corrective actions taken shall be recorded. [R]</p> <p>The Company shall review FIAS performance of the contractor or merchant annually and include in the management review. [R]</p>	
G16.4	The Company's annual FIAS audit will include review of the contractor or merchant audit reports and schedule.	
G16.5	It is NOT permitted for the approved non-FIAS contractor to further subcontract storage and/or transport of Company owned product or in the case of approved merchants, to undertake wholesale sales to third parties.	
G16.6	Where there are approved non-FIAS contractors or merchants providing services for more than one FIAS certified Company, they should be expected and encouraged to join the FIAS scheme.	Annual volumes and location should be taken into account.
G16.7	<p>A list of the Company's current non-FIAS contractors and merchants approved under this derogation, will be held by the Certification Body.</p> <p>Details may be provided on request to UK authorities.</p> <p>The Company must notify the Certification Body of any removals from the list.</p>	<p>The derogation applies to the Company and its approved non-FIAS contractors / merchants only. The approval is not valid for the non-FIAS contractor / merchant with any other FIAS company.</p> <p>The current FIAS status of a company may be checked on the AIC Trade Assurance Checker: www.agindustries.org.uk/trade-assurance-checker. Approval status of a contractor/merchant may be checked by contacting the Certification Body, 01423 878873 or uk.fias@kiwa.com</p>

G17	Audits and assessments of suppliers and contractors	
G17.1	<p>When the Company conducts an audit of a supplier of goods or services, they must ensure that:</p> <ul style="list-style-type: none"> the audit is completed at a defined frequency based on risk assessment and supplier performance with the exception of approved non-FIAS storage and transport contractors and merchant customers who must undergo an audit initially and annually as per clause G16 the audit covers all relevant aspects of the FIAS Standard 	<p>The FIAS certification body will require evidence that the audit has been completed competently and records demonstrate that the supplier will and does comply with the relevant FIAS standard and Company requirements. Audit templates are provided on the AIC website, www.agindustries.org.uk/fias-resource-library.</p> <p>[T]</p>

FIAS Standard: General requirements

	<ul style="list-style-type: none"> • an audit report that records findings against each clause of the relevant standard is produced and retained • the supplier provides evidence that all non-compliances have been resolved • supplier performance in respect of FIAS requirements forms part of the annual management review 	
--	--	--

G18 Internal audits		
G18.1	The Company shall plan and conduct internal audits as a means of determining compliance with safety, security, legal, FIAS and Company requirements.	An internal audit may be carried out by a competent person, either within the Company or an external auditor. Audit checklists are available on the AIC website, www.agindustries.org.uk/fias-resource-library . [T]
G18.2	Audit findings, including any non-conformances, shall be recorded and acted upon in a timely manner [R].	

G19 Document control and record keeping		
G19.1	The Company must ensure that only the current versions of documents are in use. [R]	This may be achieved by adding: <ul style="list-style-type: none"> • a document reference number • issue date • version number • archiving system
G19.2	Documents and records (handwritten or electronic) must be designed and prepared such that: <ul style="list-style-type: none"> • their title and purpose are clear • they are dated • inadvertent use of superseded documents is prevented (G19.1) • records are legible • handwritten records are in ink • the name of the person making any entry, alteration or deletion is identifiable 	
G19.3	All records must be retained for a period not less than two years, or as required by legislation and be available to auditors at the next FIAS audit. Records must be legible and kept in suitable conditions that allow ready retrieval and prevent deterioration.	FIAS records required are listed in Appendix 4 .

FIAS Standard: General requirements

G20	Management of incidents and emergencies	
G20.1	<p>The Company shall have a documented procedure that outlines the actions to be taken in the event of a product related incident where it is established that product safety, legality, security or traceability has been compromised.</p> <p>The management procedures must be reviewed or practiced annually to ensure details remain up to date and effective. [R]</p>	<p>This relates to all sectors of the FIAS supply chain, and should cover foreseeable incidents such as:</p> <ul style="list-style-type: none"> • fire • theft/loss • major spills • flood
G20.2	<p>The Company shall have a documented procedure that outlines the actions to be taken in the event of any suspicious or unusual activity.</p>	<p>It is essential that the Company reports any suspicious activity to the Police or other enforcement agency as soon as possible. It is mandatory to report to the authorities, suspicious activities relating to fertilisers containing Ammonium Nitrate (>16%N), Potassium Nitrate, Sodium Nitrate, Calcium Nitrate and Calcium Ammonium Nitrate and other substances listed in the Poisons Act 1972 (Explosive Precursors) legislation. See Appendix 5 Contact details for the Anti-Terrorist Hotline: Tel 0800 789321.</p>
G20.3	<p>The Company shall record actions taken in the event of an incident, emergency or suspicious activity. [R]</p>	

G21	Product recall	
G21.1	<p>All parts of the fertiliser supply chain shall understand and support the requirements of a product recall.</p> <p>Responsibility of initiation and implementation of product recall lies with the product supplier i.e. the manufacturer or merchant.</p> <p>Transport and storage companies shall support the recall process as required by provision of traceability records or data. [R]</p>	<p>Transport and storage operators are not expected to complete a recall exercise but shall be able to supply evidence that they have traceability records.</p>
G21.2	<p>The Company supplying product shall have a documented recall procedure.</p>	<p>This should be sufficiently detailed to explain the recall process and identify the management function responsible for implementing the procedure.</p>
G21.3	<p>The Company shall take prompt action to advise and inform those affected by a product recall.</p>	<p>Depending on the nature of the product incident, this may include suppliers, customers and end users.</p>

FIAS Standard: General requirements

G21.4	The Company shall plan for the recovery and final disposal or use of affected product and stock reconciliation.	
G21.5	The Company shall test their product recall procedures at least annually and in a way that ensures their effective operation. Results of the test should be used to review the recall procedures and implement improvements, as necessary.	A recall test is a theoretical exercise which does not require the physical return of product. It should confirm that all aspects of the procedure work e.g. staff awareness of responsibilities, correctness of contact details, where to find traceability information.
G21.6	All product recalls and tests of the procedure shall be documented and form part of the Company's management review. [R]	
G21.7	Storage and transport participants shall at all times maintain comprehensive records to demonstrate traceability of product whilst in their possession. Such records shall be accessible and retained as specified by the contracting Company and in accordance with FIAS requirements.	The traceability records may be required during a product recall or recall test by the product supplier.

G22	Customer complaints	
G22.1	The Company shall establish and implement a system for recording customer complaints.	
G22.2	All complaints shall be reviewed promptly and appropriate action taken. The review shall consider the potential effect of the problem on other products or services.	
G22.3	The Company shall keep records of the complaint review and any actions taken. [R]	

G23	Security	
G23.1	<p>Suitable and sufficient security measures shall be put in place for the Company site(s) and operations. These shall be determined by risk and threat assessment including consideration of:</p> <ul style="list-style-type: none"> • unauthorised access • theft/loss • terrorism • insider threat 	<p>Appropriate and proportionate security measures need to be implemented to control access and prevent theft or loss of the product commensurate to the risk and threat identified.</p> <p>These measures may include physical security, site access control, CCTV, control of visitors/contractors etc. Guidance is available from NaCTSO website:</p> <p>www.gov.uk/government/publications/secure-your-fertiliser/secure-your-fertiliser</p>

FIAS Standard: General requirements

		or alternatively from the CPNI www.cpni.gov.uk .
G23.2	Data and Cyber Security The Company shall ensure that data, computers, networks, servers, mobile devices and electronic IT systems are protected from unauthorised access and malicious attacks.	Guidance on cybersecurity is available from www.ncsc.gov.uk .
G24	Product sourced from overseas	
G24.1	A formal contract must exist between all parties to the transaction. This must clearly lay down the terms on which the product is purchased. [R]	This will typically be under current INCO Terms.
G24.2	The Company shall ensure that fertiliser imports meet the agreed requirements of customer, user, Company and legal product and packaging specifications. [R] The Company shall comply with all relevant legislative and FIAS requirements for the import of fertiliser.	For example, a manufacturer or merchant importing fertiliser materials for processing or sale, is responsible for ensuring that the receipt, unloading of those materials at port and subsequent storage and transport of those materials until used or sold, meet the requirements of FIAS.
G25	Detonation Resistance Test (DRT) Certificates	
G25.1	A DRT certificate is required for material containing AN (including mixtures) in which the nitrogen content from AN exceeds 28% by weight. Quantities less than 500 kg and material classified as an explosive are exempt. An audit trail for the product from manufacture to final user must be maintained, evidenced by certificates and/or transaction records. These must be retained for a period of at least 2 years after the date of supply. [R]	Refer to: Appendix 1 Where AN is not being used as a fertiliser, an exemption certificate must be granted by HSE as per clause 10 of SI1082/2003 .

Fertiliser Manufacture and Packing

Clause	Requirement	Guidance
MP 1	Product development	
MP1.1	The Company shall ensure that relevant product safety and quality attributes are managed during the development of all new products or changes to existing products. [R]	<p>Examples of characteristics that should be considered during the product development process are:</p> <ul style="list-style-type: none"> • self-sustaining decomposition • resistance to detonation • caking tendency • dust formation • compatibility • thermal cycling • quantity of product being manufactured • length of time in storage <p>Refer to: Appendix 1: The Fertilisers (Sampling and Analysis) Regulation 1996 Appendix 2: Fertilizers Europe Guidance for Compatibility of Fertilizer Blending materials</p>
MP2	Product information	
MP2.1	<p>The Company shall comply with all relevant legislation for labelling and the supply of product safety information.</p> <p>Where there is no requirement in legislation to provide product safety information, as a minimum the Company shall make such information available on request.</p>	<p>Legislation requires the Company to document safety information about their products and provide this under specific circumstances, for example, Safety Data Sheets.</p>
MP3	Manufacturing process control	
MP3.1	The Company shall ensure that the manufacturing operation is carried out under controlled conditions to ensure production processes comply with specification and legislative requirements.	<p>To demonstrate due diligence, controlled conditions would typically include:</p> <ul style="list-style-type: none"> • documented procedures • blend formulations • calibrated equipment • defined process parameters • competent personnel
MP4	Product inspection and testing	
MP4.1	A product inspection and testing regime shall be planned and implemented to ensure compliance with all legal, Company and customer requirements. [R]	<p>Inspection and testing may include nutrient analysis and product weight. Refer to Appendix 1.</p>

Fertiliser Manufacture and Packing

MP5	Finished product packaging	
MP5.1	The Company shall ensure that all packaging is suitable for the classification and analysis of product.	<p>Packaging specifications take into account safety factors, suitability, labelling and any other legal requirements.</p> <p>Packaging material / construction specifications for hazardous products must comply with ADR Regulations.</p> <p>Further information on specifying suitable packaging can be found on the FIBCA website https://fibca.com/</p>
MP5.2	The Company shall comply with legal requirements for the labelling of all fertiliser.	<p>The fertiliser may be in bags, containers or bulk and the product information or statutory declaration either with the material or the delivery documents.</p> <p>Packaging labelling and marking requirements for hazardous products must also comply with ADR Regulations.</p> <p>In addition to statutory labelling requirements, the National Counter Terrorism Security Office (NaCTSO) recommend that fertiliser bags carry the “Secure your fertiliser” logo.</p>
MP6	Non-conforming product	
MP6.1	<p>The Company shall have a documented procedure for handling non-conforming product and materials which shall include, where relevant, any legal obligations.</p> <p>Systems shall ensure that any non-conforming material is identified, segregated, evaluated for any potential risk to safety and dealt with in accordance with this procedure. [R]</p>	<p>See Appendix 2 Codes of Practice and Guidance Documents including:</p> <ul style="list-style-type: none"> • FERTILIZERS EUROPE guidance for safe handling and utilization of nonconforming fertilisers and related materials for fertiliser producers • AIC/Defra/HSE guidance note for manufacturers, importers, blenders, transporters, storekeepers and suppliers of ammonium nitrate based fertilisers.
MP6.2	Where there is the potential for DRT failed Ammonium Nitrate material to be present, then the Company must have a contingency plan in place. [R]	Refer to: AIC/Defra/HSE guidance note for manufacturers, importers, blenders, transporters, storekeepers and suppliers of ammonium nitrate based fertilisers.
MP7	Calibration of plant and equipment	
MP7.1	The Company shall calibrate all equipment that is used to confirm compliance with either legal or specified product requirements.	<p>Incorrect calibration or operating outside the tolerance required may lead to product recall or reprocessing of material.</p> <p>Trading Standards may visit site and request evidence of compliance with legal requirements.</p>

Fertiliser Manufacture and Packing

	<p>The Company shall maintain a schedule of calibration for all equipment requiring compliance and shall keep a record listing</p> <ul style="list-style-type: none"> • the re-calibration interval • the accuracy required • the calibration results or certificate • the calibration method <p>[R]</p> <p>If equipment is found to be outside the accuracy tolerance when calibrated, the Company shall carry out an investigation to check the consequences of the failure on the legality of the product. [R]</p>	
--	---	--

MP8	Product identification and <u>traceability</u>	
MP8.1	<p>The Company shall identify raw materials and finished products to enable recognition and traceability to the extent required by the business process risk assessment and legislation.</p> <p>The level of traceability for different products will vary. For example, in the case of “relevant” AN, it is necessary to identify and trace the finished product to all destinations. For all other products, the principle of “one up/one down” traceability should be applied.</p>	<p>Refer to AIC Code of Practice for the Transfer and Traceability of Fertiliser classified as Dangerous Goods.</p> <p>The Ammonium Nitrate Materials (High Nitrogen Content) Safety Regulations 2003</p>

Storage

Clause	Requirement	Guidance
S1	Scope of Storage	
S1.1	Storage includes all activities concerned with moving and holding fertiliser including transit and/or quayside storage. For full definition of storage refer to Appendix 3 .	
S1.2	Handling of Fertilisers 16% Nitrogen or greater For further information, refer to: AIC Guide for the Storage, Handling and Transportation of Ammonium Nitrate Based Fertilisers 2015 ; HSE INDG230 Storing and handling Ammonium Nitrate and additional guidance within S4.1.	
S2	Storage construction and design	
S2.1	Buildings must be constructed to provide suitable and sufficient security measures in line with the requirements in G23 and the business process risk assessment study contained within G10. Where used, buildings must be in good order and capable of shielding the products from the weather.	Guidance for building security can be obtained from the National Counter Terrorism Security Office (NaCTSO) website: www.gov.uk/government/publications/secure-your-fertiliser/secure-your-fertiliser
S2.2	Buildings (including floors) must be constructed and maintained using not-readily combustible materials such as brick, concrete or steel, suitably protected where necessary against corrosion.	Galvanised items such as sheeting, vents and girders should be avoided as far as possible in the construction because of the zinc content which is known to react with AN. Bitumen joints or coatings should be avoided. Where asphalt is used for flooring this should be below 9% bitumen content.
S2.3	Floors of buildings and external storage yards must be maintained in good condition to prevent significant cracks and holes developing that may become filled with compacted fertiliser.	This could lead to confinement leading to a hazard in the event of a fire.
S2.4	Where internal drains, pits or channels exist, these must be securely sealed or in-filled with inert material.	In the event of a fire, molten fertiliser could become confined in drains or channels.
S2.5	Raw materials and finished product must be protected from potential sources of heat and/ or ignition.	This should include consideration of protection against fire or lightning strikes.
S2.6	Lighting and other electrical installations must be adequately protected from corrosion by means of separation from product and/ or sealing.	Consider IP ratings of electrical equipment.

Storage

S3	Fire precautions	
S3.1	A suitable and sufficient supply of water adequate to deal with an outbreak of fire must be available near the building.	This should be discussed with the local Fire and Rescue Service.
S3.2	A suitable fire detection system and firefighting equipment must be in place where indicated by the Fire Risk Assessment and maintained. [R]	
S3.3	Equipment and vehicles must be stored/parked separately from product or packaging.	

S4	Storage operations	
S4.1	<p>Under the Dangerous Substances (Notification And Marking Of Sites) (NAMOS) Regulations 1990, as amended on 6th April 2013, sites which hold certain fertilisers are required to notify the relevant authorities (HSE and/or local Fire and Rescue Service) and display warning signage at site entrances. [R]</p> <p>The Company shall ensure that storage facilities, including outside storage yards and quaysides, have been notified to the relevant authorities and are marked in accordance with legislation and are suitable for the fertiliser raw materials and finished products being stored. [R]</p> <p>The type of storage facility required and the necessary equipment required to operate the facility in a safe and secure manner shall be determined by the business process risk assessment.</p>	<p>Further details may be found here:</p> <ul style="list-style-type: none"> • <u>NAMOS Guidance:</u> <ol style="list-style-type: none"> i) INDG467 Dangerous Substances (Notification And Marking Of Sites) (NAMOS) Regulations 1990 https://www.hse.gov.uk/pubns/indg467.htm ii) Appendix 7 • <u>Storage Guidance:</u> <ol style="list-style-type: none"> i) INDG 230 Storing and Handling Ammonium Nitrate www.hse.gov.uk/pubns/indg230.pdf ii) www.hse.gov.uk/explosives/ammonium/delivery-guide-inspection.htm • AIC Guide for the storage, handling and transportation of ammonium nitrate based fertilisers 2015 <p>Note: Stores registered and inspected by BASIS or otherwise independently audited against the current version of the Code of Practice for suppliers of pesticides to agriculture, horticulture and forestry (“Yellow Code”) need not be included in the FIAS scope as long as only fertilisers defined as micro nutrients or foliar fertilisers (see Appendix 3 definitions) are held on the site within the secure store.</p>
S4.2	If fertiliser is unloaded and temporarily stored by the unloader, storage	The business process risk assessment should include consideration of potential delays in transit and temporary storage.

Storage

	conditions must meet the requirements of both the HSE and the FIAS Standard.	
S4.3	Where the Company arranges for the storage of fertiliser raw materials or product in a third party store, the store shall be FIAS certified or a contractor approved as per Clause G16.	
S4.4	<p>The Company shall ensure that the storage operation is carried out under controlled conditions to ensure that the business processes comply with legislative and customer requirements.</p> <p>These shall include:</p> <ul style="list-style-type: none"> • contractor control • firefighting equipment • fire prevention • handling of spills • housekeeping • inspections • inventory management • maintenance • product receipt / despatch • product storage and handling • proximity to combustible materials • security • site access control • smoking 	
S4.5	<p>The Company shall identify raw materials and finished products to enable recognition and traceability.</p> <p>The level of traceability for different products will vary. For example, in the case of “relevant” AN it is necessary to identify and trace the finished product to all destinations. For all other products, the principle of “one up/one down” traceability should be applied.</p>	<p>Refer to:</p> <ul style="list-style-type: none"> • AIC Code of Practice for the Transfer and Traceability of Fertiliser classified as Dangerous Goods • The Ammonium Nitrate Materials (High Nitrogen Content) Safety Regulations 2003
S4.6	For bulk or bagged stored raw materials or finished product, there must be sufficient clearance between the top of stacks and any overhead structures such as eaves, beams, light fittings or conveyors, in order to protect product from heat and contamination.	
S5	Operation of bulk storage bays	
S5.1	Storage facilities holding bulk product in separate bays should identify the material in each bay.	

Storage

	<p>Appropriate cleaning of bays at product change should be undertaken to ensure avoidance of cross contamination. Particular attention should be paid to product changes in bays containing Ammonium Nitrate based fertilisers.</p> <p>A thorough changeover clean is necessary for bays moving from storing urea to ammonium nitrate based fertilisers or vice versa. [R]</p>	
S6	Material receipt and intake	
S6.1	<p>On receipt, the Company shall verify the origin and conformity of materials and products by checking delivery document information against order requirements. [R]</p>	
S6.2	<p>Handling systems used for materials and products unloading and transfer to stockholding location, should be designed and maintained to avoid cross contamination of product.</p>	
S6.3	<p>Where the Company receives or despatches materials or products classified as dangerous goods, the relevant transport regulations must be met. ADR requires the appointment of a qualified Dangerous Goods Safety Adviser (DGSA). The Company must hold a copy of the DGSA's current certificate and annual report. [R]</p>	<p>The duty of a DGSA is to advise the Company and provide an annual report on all necessary measures to ensure full compliance to ADR.</p>
S6.4	<p>Upon receipt, the receiving Company shall provide the delivery driver with the signature and full printed name of the Company representative authorised to receive the raw material or fertiliser product.</p> <p>By prior arrangement, other verifiable means of demonstrating correct delivery may be agreed between the receiver and the consignor. [R]</p>	
S7	Material loading and despatch	
S7.1	<p>The Company shall check that the collecting driver possesses:</p> <ul style="list-style-type: none"> • unique collection reference no. • product description 	<p>The haulier will have been informed at the time of the order what he is expected to carry.</p>

Storage

	<ul style="list-style-type: none"> • quantity 	
S7.2	For fertilisers classified as dangerous goods the Company shall check the driver's ADR certificate or card and photographic ID. [R]	
S7.3	The Company must obtain a signature and printed name of the driver to confirm the load details. [R]	
S7.4	The Company shall provide suitable and sufficient facilities for safe load securing and sheeting.	For guidance refer to: www.hse.gov.uk/workplacetransport/information/sheeting.htm
S7.5	The Company must have a process which ensures the correct product and quantity is loaded and the packaging is not damaged or otherwise showing signs of potential failure.	
S7.6	Bulk fertiliser shall only be loaded into compartments that have been checked to confirm the absence of contaminants or residues from previous loads. Compartments for solid fertiliser shall be fully sheeted.	
S7.7	Bulk liquid fertiliser shall only be loaded into suitable bulk liquid containers or road tankers	
S7.8	In the case of sales of bulk fertilisers, the collecting vehicle must be weighed prior to and after loading to give an accurate weight of product delivered.	The use of assumed tare weights for vehicles is not acceptable. Alternative methods of demonstrating the actual quantity of product loaded may be used.

Product sales and delivery/Merchunting

Clause	Requirement	Guidance
M1	Product sales	
M1.1	The Company must have in place a system to control the sales of fertilisers and explosive precursors and demonstrate that it takes adequate and reasonable precautions to ensure products are being purchased for bona-fide purposes. [R]	
M1.2	Sales of all fertilisers of 16% N and above shall be to account holding customers. In the case of sales of all other fertilisers, the customer must either be an account holder or be required to provide proof of identity which shall be recorded by the Company. [R]	Where fertilisers that are below 16% N are sold to non-account holding customers then the Company needs to get proof of identity such as passport, driving licence and record the name and address against the sale.
M1.3	Sales of fertiliser must only be made to merchant customers who are FIAS Certificated or are approved as per Clause G16.	
M1.4	The Company must have systems in place to ensure that non-FIAS certificated Merchants are not able to purchase fertiliser unless audited as per Clause G16.	
M1.5	The Company shall keep records of all customers and product sales. [R]	
M1.6	The Company shall evaluate suspicious or unusual requests to purchase fertiliser and explosive precursors and report these to the authorities. [R] It is mandatory to report suspicious activities relating to fertilisers containing: <ul style="list-style-type: none"> • Ammonium Nitrate (>16%N) • Potassium Nitrate • Sodium Nitrate • Calcium Nitrate • Calcium Ammonium Nitrate Together with other substances listed in the Poisons Act 1972 (Explosive Precursors) legislation.	Unusual or suspicious requests may include, but are not limited to: <ul style="list-style-type: none"> • Identity – New customer or identity unknown, failure to provide identity documents if requested or of a nervous or evasive nature. • Order – Reluctance to supply a written order or a client with no obvious need for the product or displaying a lack of agricultural knowledge. • Payment – Cash payment offered, refusal to pay by credit/debit card or bank account, or a readiness to pay or offer a higher price (i.e. ‘money is no problem’) • Use – Unable to explain the intended use, unwilling to accept suggested alternatives or substitutes. • Quantity – Is the amount ordered proportionate to the needs and intended end use? Unusually small or

Product sales and delivery/Merchancing

		<p>large orders. Not familiar with the handling instructions.</p> <ul style="list-style-type: none"> • Delivery address - Not linked to the client or does not appear to be an agriculturally based location. <p>Suspicious activity and reporting forms may be accessed here: www.gov.uk/government/publications/record-of-suspicious-transactions Email: Chemical.Reporting@Met.Police.UK See Appendix 5 Contact details for the Anti-Terrorist Hotline. Tel 0800 789321</p>
M1.7	The Company shall ensure that all customer order requirements are fully understood and that systems are in place to satisfy all these requirements. [R]	
M1.8	The Company shall make available to end user customers the “NaCTSO Fertiliser Security Five Point Plan”.	The NaCTSO plan has been endorsed by FIAS and partner agencies and provides end users with security guidance. See: www.gov.uk/government/publications/secure-your-fertiliser/secure-your-fertiliser
M1.9	Any on-line sales of fertilisers by the Company must meet FIAS requirements.	Refer to: AIC guidance for sales of fertilisers products on-line

M2	Sales representatives and agents	
M2.1	<p>Where the Company uses sales representatives that are not employed by the Company, they shall be required to operate under the Company’s procedures and systems.</p> <p>A record of training given to non-employed sales representatives must be kept. [R]</p>	
M2.2	Where an agent or broker facilitates sales of fertiliser for the Company, the agent must be made aware of their responsibilities to report suspicious activity. [R]	<p>See section M1.6 above for FIAS requirements.</p> <p>Refer to Appendix 3: Definition of agent/broker</p>

M3	Product advice	
M3.1	The Company shall ensure that all fertiliser related agronomic or usage advice to the customer is provided by a current FACTS Qualified Adviser.	<p>FACTS Qualified Advisers are issued with annual ID cards as confirmation of their qualified status.</p> <p>An adviser’s status may be also be confirmed by contacting BASIS on 01335 340858 or help@basis-reg.co.uk</p>

Product sales and delivery/Merchandising

	The Company must be able to demonstrate that all its FACTS Qualified Advisers are up-to-date in their knowledge with current Membership of the BASIS Professional Register.	
M4	Product delivery	
M4.1	Where the Company arranges for the delivery of fertiliser to the customer using a third party haulier, the haulier shall be FIAS certified or a contractor approved as per Clause G16. [R]	
M4.2	<p>The Company shall inform the haulier of their requirements at the time of requesting the transport services. These shall include:</p> <ul style="list-style-type: none"> • unique collection reference no. • collection address • Dangerous Goods description as appropriate • product description • quantity • full name, delivery address and contact telephone number 	<p>The Company needs to inform the haulier at the time of the order what he is expected to carry.</p> <p>This enables the haulier to take into account the necessary qualifications of the driver, type of vehicle required and the compatibility of other materials that may be carried.</p>
M4.3	Where fertiliser classified as dangerous goods is to be consigned for delivery from a location operated by a 3 rd party, the owner of the goods must provide the 3 rd party consignor with all the information requirements specified in ADR 5.4.1.	
M4.4	Where fertiliser classified as dangerous goods is to be consigned for delivery from a location operated by a 3 rd party, the owner of the goods must either provide, or verify that the 3 rd party provides, compliant documentation to collecting hauliers, in accordance with M4.3. [R]	
M4.5	For reasons of safety and traceability, every effort should be made to persuade the receiver to unload product in packaging appearing to be damaged. Where this is not achieved the destination of damaged or rejected product must be agreed between the supplier and the haulier undertaking the delivery.	

Product sales and delivery/Merchanting

M5	Product incompatibility	
M5.1	The consignor shall confirm that ammonium nitrate based fertilisers are not loaded as part loads with incompatible materials such as combustible materials or acids.	Refer to AIC Guide for the Storage, Handling and Transportation of Ammonium Nitrate Based Fertilisers 2015

Transport

Clause	Requirement	Guidance
T1	Transport instructions	
T1.1	Transport operators must ensure that they know their customers to be bona fide fertiliser companies and carry out sufficient checks to ensure that any new customers are verified as bona fide fertiliser businesses. [R]	Confirmation that customers are shown as certified or approved on the AIC Trade Assurance Checker would be acceptable.
T1.2	Transport operators shall ensure that the transport operations are only allocated to trained drivers and fit-for-purpose vehicles.	Where fertilisers that are below 16% N are sold to non-account holding customers then the Company needs to get proof of identity such as passport, Driving Licence and record the name and address against the sale.
T2	Receiving instructions from customers	
T2.1	When transport operators are contracted to carry fertiliser, they must ensure that fertiliser collection or delivery requirements have been provided in written or electronic form.	
T3	Passing instructions to drivers	
T3.1	<p>Transport operators shall operate a secure system for informing drivers of customers' transport requirements. As a minimum the driver shall be informed of the following [R]:</p> <ul style="list-style-type: none"> • unique collection reference no. • collection address • product description • quantity • delivery address • Dangerous Goods information <p>Drivers shall be provided with sufficient information to enable them to meet the requirements of the collection site.</p>	
T4	Drivers	
T4.1	Drivers shall have the necessary PPE required by customers for access to collection or delivery sites.	PPE – Personal Protective Equipment
T4.2	Drivers should have a method and be provided with written instructions communicating with their employer and	For example, phone, written instructions, and relevant contact details.

Transport

	the emergency services in the event of an emergency or incident.	
T5	Collection	
T5.1	Bagged fertiliser shall be fully covered and adequately secured to the vehicle platform to ensure the security of the load in transit is not compromised.	
T6	Safety and security	
T6.1	Transport companies must have an operator's licence. [R]	Operator's licence is verifiable on-line: www.vehicle-operator-licensing.service.gov.uk/search/check-vehicle-operator-decisions-applications
T6.2	Where the transport operator carries materials or products classified as dangerous goods, the relevant transport regulations must be met. ADR requires the appointment of a qualified Dangerous Goods Safety Adviser (DGSA). The Company must hold a copy of the DGSA's current certificate and annual report. [R]	The duty of a DGSA is to advise the Company and provide an annual report on all necessary measures to ensure full compliance to ADR.
T7	Vehicles	
T7.1	Vehicles, whether hired, leased or owned shall be equipped with the necessary safety equipment, identification and documentation for the fertiliser carried, where required by law.	Where ADR applies to the load, the vehicle needs to carry placarding, specific safety equipment, PPE and documentation in accordance with the CDG Regulations. For example, goggles, rubber gauntlets etc. DGSA recommendations should be followed.
T7.2	Parking and the leaving of unattended vehicles carrying fertiliser products shall be in accordance with ADR requirements and the Terms and Conditions agreed between the haulier and its customer. When a vehicle is parked or left unattended the driver must leave it locked and ensure that the load is secure and undamaged. Upon returning to the vehicle the driver must check that no loss or damage has occurred to the consignment. If any such damage or loss has occurred the driver shall follow the procedures described within their employer's security measures in accordance with the requirements of ADR 1.10 and the	The preferred parking location would be a secure yard with locked gates and access control measures in place. Where such facilities are not available the vehicle should be left in a recognised HGV parking area, where the presence of other vehicles and drivers may help to prevent interference or loss. Isolated lay-bys and parking areas should only be used as a last resort. The driver should seek authorisation from their employer prior to utilising such an isolated location and must remain with the vehicle at all times.

Transport

	incident must be immediately reported to the Police. [R]	
T7.3	Where vehicles carrying fertiliser products are parked or left unattended, the driver shall follow the procedures described within his employer's security measures and/or in accordance with the requirements of ADR 1.10. [R]	The haulier's security measures should include written guidance to drivers regarding security procedures for parking up and/or leaving the vehicle unattended.
T8	Delays in transit	
T8.1	If fertiliser is unloaded from the collection vehicle and temporarily stored by a transport operator, storage conditions must meet the requirements of both the HSE and the FIAS Standard for Fertiliser Storage.	The business process risk assessment should include consideration of potential delays in transit and temporary storage.
T9	Delivery	
T9.1	Drivers shall only deliver to the addresses shown on the delivery documents unless a diversion is approved by the consignor in a recordable manner. [R] If the recipient requests a different delivery address, the driver must contact his employer for approval from the consignor before proceeding.	
T9.2	Discrepancies in quantity must be recorded on the delivery note and communicated to the consignor immediately. [R]	
T9.3	Upon delivery, the receiving Company shall provide the delivery driver with the signature and full printed name of the Company representative authorised to receive the raw material or fertiliser product. By prior arrangement, other verifiable means of demonstrating correct delivery may be agreed between the receiver and the consignor when the consignor has carried out a security and safety risk assessment. [R]	In some cases, e.g. on farm, the driver may find there is no one available to receive the delivery. If this happens and no prior arrangement has been made, the driver must not unload and must contact their traffic office or the collection site for instructions on what to do with the undelivered load.
T9.4	For deliveries of bulk solid or liquid fertiliser to farm and by prior arrangement with the consignor of the fertiliser, other verifiable means of demonstrating correct delivery are acceptable when the consignor has	Where other means of verifying delivery are used, the business process risk assessment should consider the nature and quantity of the product delivered and the period of time before the customer will confirm receipt.

Transport

	carried out a security and safety risk assessment [R]

Appendix 3 Definitions

Agent (or Broker)

An agent (or broker) facilitates a contract between a buyer and a seller but takes no financial involvement in the transaction except to receive a commission from either buyer or seller or both. If a Body, Person or Company that acts as a principal to the debt incurred in the supply of fertiliser, they are a merchant. If the agent is authorised to agree sales on behalf of a company or enter sales into the system then they must be trained as a sales representative.

Blended fertiliser

A fertiliser obtained by dry mixing of more than one fertiliser, with no chemical reaction.

Business process risk assessment

An assessment for the purposes of FIAS which identifies the hazards, threats and resulting risks related to legal compliance, security, traceability and product safety of all fertiliser operations undertaken by the business.

It is distinct from a Health and Safety Risk Assessment but may follow similar principles.

Caking tendency

The ability for fertiliser granules or prills to form an agglomeration. Mechanisms for caking are numerous and include formation of crystal bridges due to incompatibility or post reactions, moisture content and/or pick up, high fines/dust content and granule deformation.

Company

The organisation certified or seeking certification under FIAS.

Compatibility

Materials when mixed together are not necessarily compatible with each other; some may produce undesirable effects when mixed with others; in other words, they may not be compatible. These undesirable effects can include chemical reaction(s) and physical effects e.g. stickiness which can cause handling difficulties, moisture migration giving rise to caking tendency. For reasons of safety, it is very important to avoid blending ammonium nitrate or raw materials containing ammonium nitrate with any organic materials.

Detonation Resistance Test (DRT)

A test carried out by a competent laboratory in accordance with Schedule 2 of the **Ammonium Nitrate Materials (High Nitrogen Content) Safety Regulations 2003**.

Foliar fertiliser

A fertiliser suitable for application to and nutrient uptake by the foliage of a crop.

Manufacturer

The natural or legal person responsible for placing a fertiliser on the market; in particular a producer, a blender, an importer, a packager working for its own account, or any person changing the characteristics of a fertiliser, shall be deemed to be a manufacturer. However, a distributor who does not change the characteristics of the fertiliser shall not be deemed to be a manufacturer.

Merchant

The Body, Person or Company that acts as a principal to the debt incurred in the supply of fertiliser to a customer and does not change the characteristics of the fertiliser. For the purposes of FIAS, companies which pack or repack fertilisers themselves, or engage a contract packer to do so on their behalf fall within the definition of manufacturer.

Appendix 3 Definitions

Micro-nutrients

The elements boron, cobalt, copper, iron, manganese, molybdenum and zinc, essential for plant growth in quantities that are small compared with those of primary and secondary nutrients.

Non-conforming product

Non-conforming materials are those materials which do not meet the characteristics of the intended products at the time of storage or when marketed. They include both off-spec and reject materials, which are defined below. Essentially, they include everything other than marketable specified product.

Off-spec

The definition of “off-spec” given in The Control of Major Accident Hazards (Amendment) Regulations 2005 is as follows:

Material rejected during the manufacturing process and to ammonium nitrate and preparations of ammonium nitrate, straight ammonium nitrate-based fertilisers and ammonium nitrate-based compound/composite fertilisers referred to in Notes 2 and 3, that are being or have been returned from the final user to a manufacturer, temporary storage or reprocessing plant for reworking, recycling or treatment for safe use, because they no longer comply with the specifications of Notes 2 and 3; or

- (b) fertilisers which do not fall within Notes 1(a) and 2, because they do not satisfy the detonation resistance test, other than fertilisers which -
 - (i) at the time of delivery to a final user satisfied the detonation resistance test; but
 - (ii) later became degraded or contaminated; and
 - (iii) are temporarily present at the establishment of the final user prior to their return for reworking, recycling or treatment for safe use or to their being applied as fertiliser.

Placing on the market

The supply of fertiliser, whether in return for payment or free of charge, or storage for the purpose of supply. Importation of a fertiliser into the customs territory of the UK shall be deemed to constitute placing on the market.

Product

All fertilisers intended for agriculture, horticulture, forestry, amenity and any other such commercial use, straight or blended.

Product Recall

Product recall is the process required to enable identification and location of non-conforming material or product at all points in the supply chain between producer and end user in order for remedial action to be agreed and implemented by the parties involved.

Raw Material

Ingredient used in the production of fertiliser intended for agriculture, horticulture, forestry, amenity and any other such commercial use.

Reject

Reject materials are those non-conforming materials which are out of specification, or which have deteriorated during storage and/or handling to such an extent that they can be considered potentially

Appendix 3 Definitions

hazardous. They cannot be sold as fertiliser products and may require treatment to render them safe. Examples include those which contain more than the maximum permitted level of combustible material; those which have physically degraded into fines and could reasonably be expected to fail the Detonation Resistance Test; product grossly contaminated with reactive substances.

Relevant Ammonium Nitrate

The definition given in the Ammonium Nitrate Materials (High Nitrogen Content) Safety Regulations 2003 is:

Ammonium nitrate in solid form, where its nitrogen content is more than 28% of its weight, material in solid form, comprising a mixture of components, one of which is **ammonium nitrate**, in circumstances where the nitrogen content derived from **ammonium nitrate** is more than 28% of the material by weight, and where the material has a total weight of five hundred kilogrammes or more, but does not include material which is a classified explosive.

Relevant Ammonium Nitrate Mixtures

The Dangerous Substances (Notification And Marking Of Sites) (NAMOS) Regulations define 'relevant ammonium nitrate mixtures' as ammonium nitrate and mixtures containing ammonium nitrate, where the nitrogen content exceeds 15.75% of the mixture by weight.

This definition was transferred from the NIHHS Regulations.

Resistance to detonation

The ability of a fertiliser to resist detonation determined by the Detonation Resistance Test.

Self-sustaining decomposition

A fertiliser capable of self-sustaining decomposition is defined as one in which decomposition initiated in a localised area will spread through the mass after removal of the initiating heat source. This type of fertiliser is commonly known as a "cigar burner".

Source of Supply

The place from which materials are purchased.

Storage

The provision of facilities for the holding of stocks of fertiliser such as warehouse buildings, outside areas including port quaysides, on either an ongoing, temporary or in-transit basis, together with management of personnel employed and the operation of any equipment used, for the handling of such fertiliser.

Straight fertiliser

A nitrogenous, phosphoric or potassic fertiliser having a declarable content of only one of these primary nutrients.

Supplier

The company that sells fertiliser within the scope of FIAS

Suspension fertiliser

A concentrated suspension of finely divided nutrients in a supersaturated nutrient solution, stabilised using a clay or polymer based gelling agent, allowing tailor-made ratios of N, P, K, Mg, Na, S, B, Mn, Zn,

Appendix 3 Definitions

Cu, Mo and Se plus nitrification inhibitors and phosphate enhancers to be uniformly applied to the soil by spray application

Thermal cycling

A thermal cycle is the application of heat to a closed sample of ammonium nitrate to a temperature of 50°C followed by cooling to 25°C. The combination of successive phases at 50°C and 25°C forms one thermal cycle.

Traceability

The ability to track and follow a material or product through all stages of sourcing, production, storage, sales and distribution to end user.

Appendix 4 Records

The following is a list of the records identified within the text of FIAS and which must be kept.

Clause No	Record Required
G2.2	Policy statement
G3.1	Management review
eG5.1	Records of communication of staff responsibilities
G6.1	Training and competence records
G6.3	Security screening of staff
G9.2	Notification/approvals for products held on site.
G10.1	Business process risk assessment records - team members, risks associated with the products, process descriptions, hazard and risk assessments, controls and action plans
G11.1	Business process assessment review
G13.1	Supplier approval
G13.1	Purchase specifications and records
G15.1	Contracted services – FIAS certification confirmation
G16.2	Non-FIAS Contractor or merchant customer initial audit and inspection assessments, reports and authorisations.
G16.3	Non-FIAS Contractor or merchant customer annual audit and inspection assessments, reports and management review record.
G18.2	Internal audit reports and follow-up information
G19.1	Document control records
G20.1	Incident management procedure and review
G20.3	Notification of suspicious or unusual activity to enforcement agencies; actions taken
G21.1	Traceability records
G21.6	Verification of product recall system in management review
G22.3	Complaints and actions taken
G24.1	Purchase contracts for product sourced from overseas
G24.2	Notification to authorities of AN import
G24.2	Compliance of fertiliser imports to specification and legislation
G25.1	DRT certificate/product transaction records
MP1.1	Management of new product development
MP4.1	Product inspection/test records
MP6.1	Non-conforming product records
MP6.2	Contingency plan for DRT failed AN
MP7.1	Equipment calibration, Calibration failure investigation
S3.2	Fire detection system and firefighting equipment maintenance
S4.1	Notification and signage for products held
S5.1	Product changeover cleaning record
S6.1	Verification of incoming material

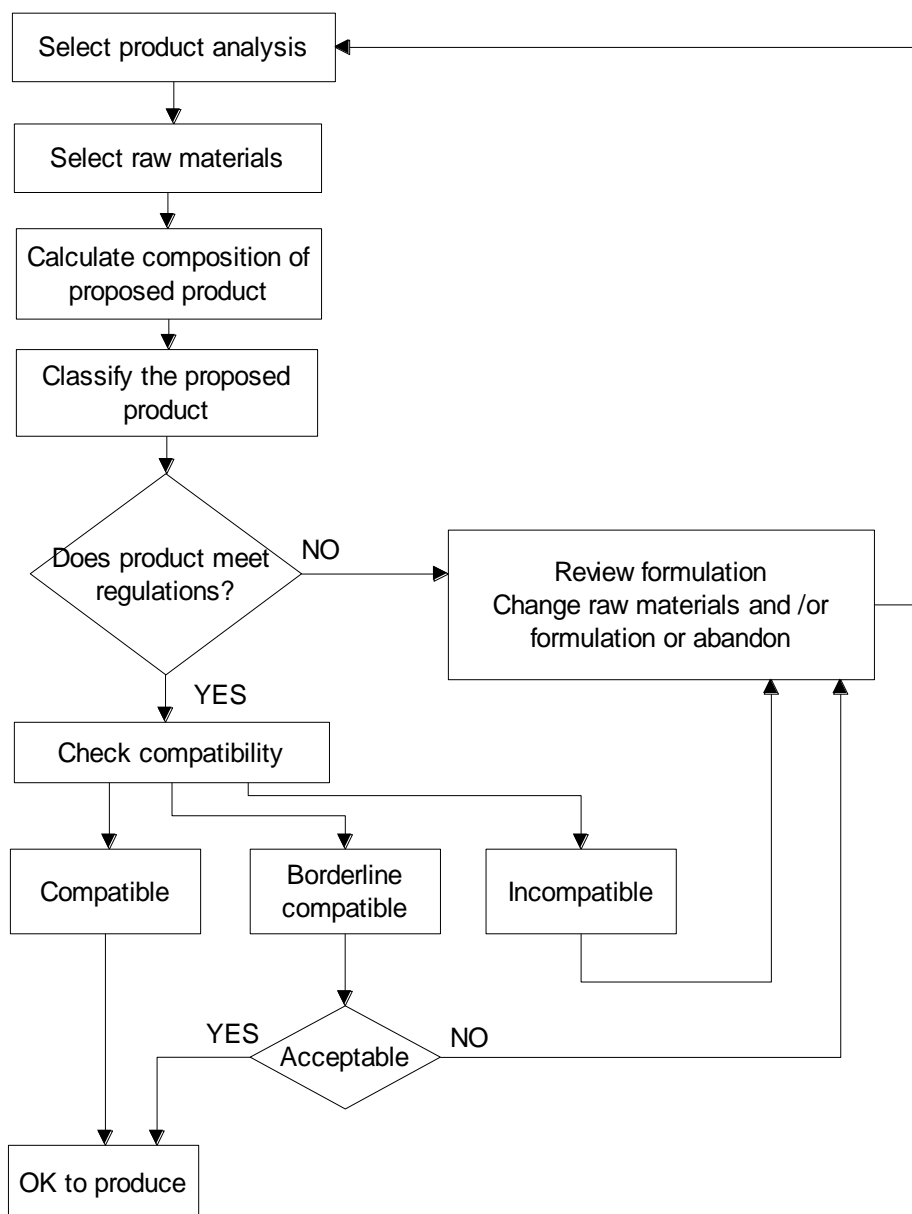

Appendix 4 Records

Clause No	Record Required
S6.3	Appointment of DGSA, certificate and annual report
S6.4	Signature and name of employee Agreement of other verifiable means
S7.2	Checks of vehicle/driver legal compliance
S7.3	Name/ Signature of driver
M1.1	Customers and product sales checks
M1.2	Non account holding customer details
M1.5	Customer and sales records
M1.6	Evaluation of suspicious requests to purchase products
M1.7	Customer requirement records
M2.1	Training of sales representatives
M2.2	Agent responsibilities
M4.1	Approval of hauliers
M4.4	Verification of compliance
T1.1	Instructions received from clients Bona fide client checks
T3.1	Instructions passed to drivers
T6.1	Current operator's licence
T6.2	Appointment of DGSA and certificate
T7.2	Damage or loss reporting
T7.3	Security measures taken when parked/ unattended
T9.1	Approval of diversion of deliveries
T9.2	Discrepancies on delivery
T9.3	Proof of delivery/ Risk assessment
T9.4	Proof of delivery/ Risk assessment for bulk solid or liquid fertilisers

Appendix 6 Product development flowchart

Appendix 7 Guidance for compliance with the Dangerous Substances (Notification And Marking Of Sites) (NAMOS) Regulations

1. Under the Dangerous Substances (Notification And Marking Of Sites) (NAMOS) Regulations 1990, as amended on 6th April 2013, sites which store certain fertilisers have a requirement to notify the relevant authorities and display warning signage at the site entrances.
2. **Sites which hold 25 tonnes of material classified as being 'Dangerous Substances' are required to notify both the HSE and local Fire and Rescue Service.** This includes all fertilisers which display the hazardous classification symbol for 5.1 oxidising substances under the Carriage of Dangerous Goods regulations (ADR). (This will include Ammonium Nitrate based products).
3. Sites which hold 25 tonnes of material classified as being 'Dangerous Substances' are required to place a **'Dangerous Substance' warning symbol at all access points** to the site.
4. **A person in control of a site which holds a total quantity of 150 tonnes or more of 'relevant ammonium nitrate mixtures'** (see [Appendix 3 definitions](#)) **are required to notify the Fire and Rescue Service for the area in which the site is located.** (There is no requirement to notify the HSE).

A typical ratio would be 25.5.5 which equates to 25% N, 5% P and 5% K. In this example the Nitrogen would contain both Nitric Nitrogen (N) 12.5%, and Ammoniacal Nitrogen (N) 12.5%, thus making the total Nitrogen (N) content 25%.
