You're here: Trade Assurance Schemes → TASCC - Trade Assurance Scheme for Combinable Crops

TASCC - Trade Assurance Scheme for Combinable Crops

Provides an assurance system for the trading of combinable crops for food, feed and biofuel use, the trading of compound feed and feed materials and the transport and storage of combinable crops and animal feeds to meet safety requirements defined by legislators and industry.

TASCC was developed because farmers and end users wanted to be sure that crops of grain, oilseeds and pulses were treated responsibly once they left the farm. That includes wheat processed by flour millers and malting barley for the brewers and distillers in the drinks industry. It provides independent verification that the trade is meeting food and feed safety laws.
